

**COURSES OUTLINE**

**CONSTRUCTION RISK MANAGEMENT : TOOLS & TECHNIQUES FOR CONSTRUCTION PROJECTS (2 DAYS)**

**PROGRAM OVERVIEW**

This 2-day seminar offers participants the opportunity to learn how to effectively implement best practices in project risk management in the construction industry. Participants will be introduced to risk management best practices that are specific to the construction industry. Learn how to apply risk identification, qualitative risk assessments, develop risk responses and monitoring risk throughout the life of your project.

**OBJECTIVE**

By the end of this program participants will be able to:

- Explain the key components of the Construction Industry Institute's (CII) risk management process
- Conduct a risk identification meeting in a manner that increases team alignment
- Select an appropriate level of risk assessment based on project complexity.
- Develop actionable risk responses
- Maintain a risk Register for tracking and communicating project risk
- Understand project team roles and responsibilities in risk management
